Summary

Frontend UI/UX Designer with **2.8+ years** of experience designing SaaS platforms, enterprise dashboards, responsive web and mobile applications. Skilled in Figma, UX design, design systems, wireframing, prototyping, developer handoff, and AI-powered design workflows. Experienced in collaborating with product managers and developers to build intuitive, user-centered digital experiences.

Skills

Frontend Knowledge: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS

UI/UX Design: Product Design, UX Research, UX Psychology, Product Usability, Design Systems, Responsive Design, User Flows, User Journey Mapping, Wireframing, Information Architecture, Heuristic Evaluation, Usability Testing, Accessibility, Prototyping

Tools: Figma, FigJam, Notion, Canva, Adobe XD, Webflow, Photoshop

AI Design Tools: Figma AI, Uizard, Google Stitch, Midjourney, Claude, ChatGPT, Prompt Engineering

Visual Design: Graphic Design, Typography, Color Theory, Layout & Spacing, Iconography, Visual Systems, Grid Systems, Visual Hierarchy

Design Practices: WCAG Compliance, Usability Standards, Agile, Responsive Design, Persona Mapping, Component Libraries, Auto Layout, Figma Variables, Design Reviews, Developer Handoff

Experience

Frontend UI/UX Developer

Jan 2024 – Present

Hackerkernel, Bhopal, MP, India

Tools Used: Figma, Adobe XD, Claude, VS Code

- **Delivered UI/UX and frontend solutions for 29+ cross-platform projects across fintech, aviation, SaaS and service domains.**
- Converted Figma designs into responsive web interfaces using React.js, HTML, CSS, Tailwind CSS and JavaScript.
- Built reusable UI components and design systems to improve consistency, scalability and development efficiency.
- Defined and optimized user flows, dashboards and workflows while simplifying complex product experiences.
- Worked closely with product managers and engineers to identify user pain points and translate requirements into practical UI solutions.
- Built accessible, responsive interfaces across desktop, tablet and mobile breakpoints with attention to WCAG standards.
- Created wireframes, user flows, high-fidelity UI and interactive prototypes in Figma and supported developers through handoff

Projects

Lunchbox Order App | *Parent Meal Plan/Buy Manager* | [Project Link](#)

- Used React and Tailwind CSS to build the frontend interface
- Designed meal planning and delivery tracking flow to reduce confusion for parents and improve order visibility through QR-based tracking.
- Integrated QR code for delivery tracking, enhancing user clarity.

Mortgage AI | *AI process platform* | [Project Live](#)

- Led end-to-end UX design and front-end build for AI-based mortgage automation platform; reduced user decision time by 30%
- Optimized user journey and reduced decision-making friction through intuitive layout and flows.
- Redesigned interfaces for better understanding for User and reduced Cognitive Load

Sizzle | *Dating Web Application*

- Used Next.js to create pixel-to-pixel UI based on the provided design.
- Followed the exact design guidelines to maintain visual accuracy and consistency

Doctor-Patient Management System | *Healthcare SaaS Platform* | [Project Link](#)

- Designed responsive experiences for desktop, tablet, and mobile devices.
- Conducted UX research, user journey mapping, and workflow analysis to simplify appointment booking, patient onboarding, treatment routines, and healthcare management experiences.
- Designed role-based experiences for Doctors, Patients, and Admins, transforming complex healthcare workflows into intuitive and accessible digital products.
- Built analytics-driven dashboards for appointments, patient engagement, session tracking, and revenue monitoring, enabling data-informed decision making.
- Created scalable design systems and reusable components while collaborating closely with stakeholders and developers to deliver consistent mobile and web experiences.

Diamond Charts | *Baseball Sports Platform* | [Project](#)

March 2026 – May 2026

- Designed responsive experiences for desktop, tablet, and mobile devices.
- A live baseball scoring platform for League Managers, Team Managers, Players, and Fans where both teams can enter play-by-play actions, manage real-time match scoring, stats, standings, and schedules
- Designed real-time scoring system with inning tracking, balls, strikes, outs, player positions, and live score updates.
- Created multi-role UX flows, dashboards, team management, standings, notifications, and player statistics experiences.

Private Jet Widget Builder | *IoT Interface Design* | [Case Study Link](#)

- Simplified complex configuration workflows through intuitive UX patterns and structured information architecture.
- Designed interface to generate JSON configurations for in-flight IoT device control.
- Delivered high-fidelity prototypes for cockpit, cabin, and entertainment systems.

WOOFYCARE | *Pet Walking Application* | [Project](#)

- Designed end-to-end user experience for a pet walking platform, simplifying booking and service discovery flows.
- Removed multiple booking hurdles by redesigning key screens and flows.

Home Service WEB/APP | *Dual-Sided Marketplace* | [Project](#)

- Optimized UX for client-vendor flows, milestone tracking, and analytics dashboards.
- Enabled transparent interaction and data-driven service filtering.
- Created end-to-end marketplace workflows, form experiences, service management dashboards, and analytics interfaces.

Awards & Certifications

- Google UX Design Professional Certificate – Coursera (2024)
- Top 5% in State Level Hackathon Challenge – 2024: Ranked among top 20 out of more than 1,000 participants.

Education

B -Tech in Information Technology
Oriental College of Technology, Bhopal, MP

Graduated: 2024
Cum. GPA: 8.24
